## PREAMBLE

The Toquaht Nation asserts that we have occupied, benefited from and governed our Hahoulthee (traditional territory), lands, waters and resources since time immemorial. The traditional territory of the Toquaht Nation has in the past provided the resources necessary to sustain us and we honour our connection to the lands, waters and resources of our traditional territories which provide for our physical and spiritual needs.

The Toquaht Nation acknowledges that all life forms are Hishuk-ish-tsawalk (interconnected) and that all humanity must have Iisaak (respect for the earth and all life forms on it). Iisaak and Hishuk-ish-tsawalk are important to the management of fish, wildlife and migratory birds and their habitat as well as to the management of aquatic plant life and land based plant life and affirm that all should be recognized as intrinsically valuable.

Through our inherent right to self-government, and our responsibility given by Naas (the creator) to look after our traditional territory, the Toquaht Nation has continuously taken steps to preserve and protect our lands. We assert that resource harvesting requires an effective management system that enhances our Maa-nulth Treaty harvesting rights and contributes to the conservation of natural resources and protection of habitat. The Toquaht Nation also recognizes the need for an effective role for Toquaht enrollees in all aspects of natural resource management.

It is the desire of the Toquaht Nation that our traditional territory continues to provide the resources necessary to sustain the Toquaht Nation, preserve our traditional ways and culture, encourage self-sufficiency and security through economic development and growth and provide a home for future generations.

The Toquaht Nation adopts this Act based on these values.
